Education in Mental Health for Nurses in Home and Residential Care (EDU-MENT)

We are pleased to announce that the **Interim Report for the Erasmus+ EDU-MENT** initiative has been accepted and approved, marking the transition to the next phase of our work to enhance mental health care capacity in Europe.

EDU-MENT Program Objectives

EDU-MENT is developing a **5 ECTS Blended Learning Training programme** designed to strengthen the digital and professional competences of Registered Nurses (RNs) working in home care and residential care facilities. By equipping RNs with the tools to detect, manage, and respond to mental health issues among clients, the initiative fosters better institutional practices and builds long-term capacity in mental health care.

Key Achievements to Date

Collaborative Consortia Meetings

Two transnational meetings successfully advancing research, development, and deployment of MH-I Digital Screening Tools and Blended Learning digital frameworks and module content.

Transnational Needs Assessment Report

Documented and disseminated international needs for digital screening tools and a blended learning curriculum.

E-Platform and Blended Learning Frameworks

Documented international caregiver requirements and needs for digital screening tools and a blended learning curriculum

MH-I Digital Screening Tools

Developed the theoretical framework and technical specifications for digital tools supporting early identification of mental health challenges.

Looking Ahead

As we enter the next stage, our focus will be on driving innovation in nursing education, testing tools in practice, and expanding our collaborative impact across Europe.

We extend our sincere thanks to our dedicated partners — University of Cyprus - Software Engineering and Internet Technologies (SIET) Lab; University of Maribor - Faculty of Health Sciences (UM FHS); AgeCare/Materia; Hafelakar; South East Technical University; UMIT Tirol - Private University for Health Sciences and Health Technology; and ÖEAD - Agency for Education and Internationalization. — as well as the Erasmus+ Programme for their continuous support and high-level collaboration.
