

EDU-MENT: EDUCATION IN MENTAL HEALTH FOR NURSES IN HOME & RESIDENTIAL CARE

Co-funded by
the European Union

The EDU-MENT project develops a blended learning program (5 ECTS) designed to enhance the digital and professional competences of registered nurses (RNs) working in home care and residential care facilities.

Project Objectives

- Equip nurses with skills for early detection, monitoring, and management of mental health issues among clients.
- Introduce digital screening tools for identifying mental health risks.
- Offer a competency-based training combining e-learning and hands-on modules.
- Support sustainable institutional implementation through an organizational development concept.

EMPOWERING NURSES – STRENGTHENING MENTAL HEALTH CARE

Key Activities

- Development and testing of digital mental health screening tools.
- A Train-the-Trainer course to ensure transferability and sustainability.
- Implementation of blended learning certification courses in Austria, Slovenia, and Cyprus.
- Creation of open-access educational materials and manuals.

EXPECTED IMPACT

- Improved quality of care for clients with mental health problems.
- Increased digital readiness and professional confidence among nurses.
- Long-term integration of digital tools in nursing education and practice.
